CRANE ARM ASSEMBLY FOR 2"/2.5" K/Kpro®

A new crane arm assembly has been designed for the 2" and 2.5" K/Kpro® slurry pumps. It is no longer necessary to lift the 170 lbs. (77 kg) case by hand when carrying out pump maintenance. The newly developed crane arm assembly can be included in new pump orders or retrofitted on to existing pumps in the field. Assembly takes less than five minutes and only requires an adjustable wrench.
